Project meeting

Time   02-03-2018 18:30 – 19:00

Location   Meeting in Discord

Participants   Joonas Mattlila, Antti Nevakivi, Mohammed Laghzaoui, Shakir Pathman, Bjorn Van Reeth, Jorren Schepers

Absent   Tuomas Isoniemi (Tuomas is on a holiday in Spain)

1. **Current situations**
   - Mohammed: Testing with the Bluetooth and JSON data successfully. Implemented in the app. Sending JSON from the Arduino as a string and making it JSON object in the app to work with it.
   - Shakir and Bjorn: Working in the layout for the app.
   - Jorren: Registration and login implemented with database.
   - Antii, Tuomas, Joonas: Circuit is designed for the pull up bar. Joonas working and looking for the best way to implement Bluetooth. Maybe HC-05 Bluetooth will be used.
2. **Goals for the next**
   - Mohammed: Working further to implement as good as possible the dummy data with interface. He is going to make a mini tutorial to HW team for the Bluetooth and JSON research.
   - Shakir and Bjorn: Going to work further in the layout.
   - Jorren: Going to implement the database in a better way and integrate the dummy data in the database.
   - Antii, Tuomas, Joonas: They have holidays so after holidays Joonas is going to work further with Bluetooth. After holidays hardware team could have something done to show it to the SW teams.
   - Hardware team want to discuss the JSON structure in a meeting with both SW teams to find the best way for the implementation.
3. **Problems and solutions**
   - Everything is going smoothly
4. **Other matters**
   - Next meeting 09/03 at 15 o'clock
   - Next week Mohammed is the chairman
